

# New Generation AUXXL

EFFICIENT - RELIABLE - INNOVATIVE

## New Generation AUXXL

EFFICIENT - RELIABLE - INNOVATIVE

### Differences to AUXX:

100 mm higher

100 mm wider

useable inner dimension:

- 660 mm width
- 540 mm height
- 500 (530) mm depth

Covers trays up to 2/1 GN !

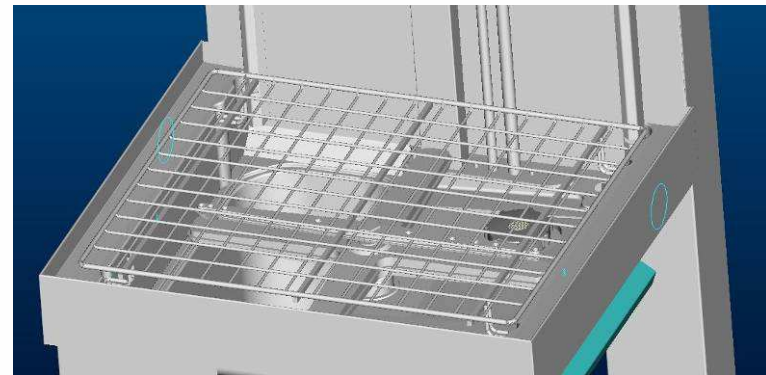

## New Generation AUXXL

EFFICIENT - RELIABLE - INNOVATIVE

### Using AUXXL as a potwasher:

The software allows to lock the high pressure wash mode temporarily (customer mode) or even steadily (service mode) to avoid repeated manual activation for every cycle.

A flat wire mesh insert may replace the standard rack track

EFFICIENT - RELIABLE - INNOVATIVE

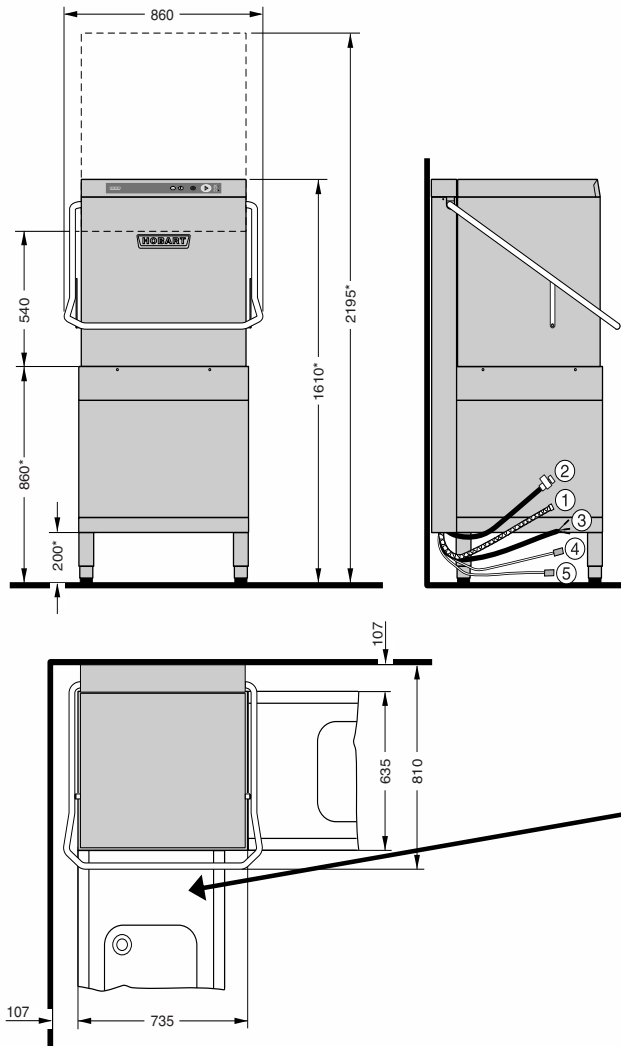

Further applications:

# New Generation AUXXL

EFFICIENT – RELIABLE - INNOVATIVE

## Attention:

In case of **corner installations** we recommend to use standard tabling (540 mm profile) fixed on the left side of the wider front – see drawing.

A kit for the necessary modification of the rack track is supplied with every machine.

## New Generation AUXXL

EFFICIENT - RELIABLE - INNOVATIVE

Attention with standard front tables and **corner installations:**

for washing **trays bigger than GN-size** you need to order a specific rack which brings the trays to a higher level above the tabling profile (not possible with 2/1 GN)

**HOBART**

**EFFICIENT - RELIABLE - INNOVATIVE**
